

The Window Film People

Since 2003, The Window Film People (TWFP) have been one of the leading window film companies in Singapore.

We specialize in the professional installation of quality Solar film and Safety film. We believe in total customer satisfaction, including a full warranty that backs up our workmanship and window film.

We pride ourselves in being able to work with a client's needs and offer solutions. That resolution translates into a home or office environment where you can enjoy the light and view through the windows without uncomfortable heat and glare.

About Us

Since 2003, The Window Film People (TWFP) have been one of the leading window film companies in Singapore. We specialize in the professional installation of quality Solar film and Safety film. We believe in total customer satisfaction, including a full warranty that backs up our workmanship and window film.

We pride ourselves in being able to work with a client's needs and offer solutions. That resolution translates into a home or office environment where you can enjoy the light and view through the windows without uncomfortable heat and glare.

What services we offer

Residential Window Film

Improve the energy performance of your home with a residential window film tinting. Not only does window film tinting reduce up to 75% of the heat from the sun's ultraviolet rays, but it also helps protect your glass from shattering in case of a collision.

Commercial Window Film

Not only will commercial window tinting provide an improvement in energy-savings for your business, commercial window tinting also protects your business from criminal break-ins.

Duracarbon

DuraCarbon Technology (Black Pearl Series)

The most advanced technology in window film. For years, window film manufacturers have searched for ways and means to go to the next level in window film design and technology. Finally, the search is over with the development of DuraCarbon window film. The latest fusion technology is a combination of the

durability of Carbon and modification of its heat rejection ability. The result is a film with outstanding ability to block the heat from the sun and its durability to withstand fading and discoloration. DuraCarbon films have exceptionally good-looking colours.

Safety Film

Our safety and security films are used where there is a potential for injury from broken glass (such as glass doors and overhead glazing). These films can be applied to toughened, annealed or laminated glass. They are available in various thickness 4mil, 7mil and 14mil. The films act as additional protection from spontaneous glass breakage and personal safety.

Model/ Spec.	Visible Light Transmission (VLT)	Total Solar Energy Rejection (TSER)	Ultra Violet Rejection (UVR)	Solar Heat Gain Coefficient (SHGC)
Clear 4 Mil	9%	15%	99%	0.85
Clear 7 Mil	9%	15%	99%	0.85
Clear 14 Mil	9%	20%	99%	0.80
